1. Upon getting your powerbank, slide the material end of the keychain into the whole on the top corner of the powerbank. Then place the metal end of the keychain through the opening of the loop and pull it through.

2. To charge powerbank: Plug the larger end of the USB wire included into a wall adapter or computer usb port (a wall will charge your powerbank faster). Plug the micro end of the wire included into the powerbank. The light should turn on indicating it is charging. For the initial charge, we recommend you charge it for 5 hours and after that, 3 hours will fully charge your powerbank.

3. To charge your device: Plug the larger end of the USB wire included into your powerbank and the micro end into your phone. If you have an iPhone, you must use the appropriate wire that you own already. The light should turn on indicating your phone is charging and the powerbank is discharging. Your powerbank is fully discharged once the light on the powerbank goes out.

This powerbank has an approximate lifespan of 500 full charges and has 2600 mah of power.
